

Miyako Jodogahama Boat Cruise

*Be fascinated by the magnificent natural scenery.
Enjoy cruising the Sanriku coast with the black-tailed gulls and sea breeze.*

⑤ Anegasaki Cape

Anegasaki cape is located at the most northerly point of Miyako Bay. The complexly formed rock faces are 60m high and are a breeding ground for the black-tailed gull.

④ Blow holes

When large waves hit this rock, the water shoots up to 30m high through the gap between rocks. This is a Japanese National Treasure.

③ Meotoiwa

These two rocks nestle close together like husband and wife, which is where it gets its name.

② Candle Rock

The 40m high white rock cannot be seen from land. It is registered as a Japanese National Treasure.

Jodogahama Beach Tour Course 40minute tour

After departing Jodogahama, cruise around the bay, and enjoy sights such as the National Treasure 「Candle rock」, 「Blow holes」 and 「Hideshima Island」.
The black-tailed gulls flock around the boat, so you can also enjoy feeding them.

The black-tailed gulls' bread

You can feed the gulls with special bread made just for them. It has been sold for over 50 years. Toss it up and they will catch it in the air and fly away. It is made using squid and kombu extracts, making it popular with the gulls. It is also edible for people, and you can purchase it on board.

Thank you for visiting Jodogahama Beach.

When the 3.11 earthquake occurred in March 2011, we lost two of our 3 ships.

Fortunately, we still have one ship remaining on which we can continue to enjoy cruising with you!

We really appreciate your continued support.

Please enjoy the unchanged beauty and power of the natural surroundings of Jodogahama Beach.
